

# ***EasyCard vs. SmartCard***

What are the differences between the EasyCard and the SmartCard? Using the SmartCard you can also download data, but there are other differences as well. This is the overview:

## ***EasyCard***

- + fool proof and tamper proof
- + sophisticated system with many features and options
- + nice design, fits in every vehicle
- + DriveRight VMS software version 2.x or 3.x required
  
- can only be connected to the DriveRight in The Netherlands (retrofit only)
- separate software needed to set up the system

## ***SmartCard***

- + easy to connect (plug and play)
- + download trip data using the smart card
- + no separate software required
  
- not entirely fool proof (driver ID can still be changed manually)
- due to the design not so ergonomic
- straight system with no extra features and options
- DriveRight FMS software version 3.x required
